SkyBitz[®]

Webinar

Meet Robert Long, CFO of USA Logistics Carriers, and find out why he chose SkyBitz trailer tracking.

Robert D. Long
Chief Financial Officer,
USA Logistics Carriers

**USA LOGISTICS
CARRIERS**

**Tuesday, June 26, 2007
at 1:30 pm – 2:30 pm EDT.**

There were many reasons why USA Logistics Carriers decided that trailer tracking would benefit their business. Primarily, they realized it would:

- Increase asset visibility
- Cut trailer idle time
- Minimize lost trailers
- Increase trailer utilization and productivity

And the reasons USA Logistics Carriers chose SkyBitz as their trailer tracking system were many, including:

- SkyBitz offers the most accurate trailer tracking; with their Smart Sensor Tracking, USA can get departure and arrival notifications down to the minute.
- SkyBitz provides information that leads to more accurate and undisputable detention billing.
- SkyBitz is the easiest system to install and maintain because of its all-in-one small size.

Join the online discussion, and see for yourself how SkyBitz trailer tracking can improve your operations.

SkyBitz[®]

Headquartered in Sterling, Va, SkyBitz developed the revolutionary Global Locating System (GLS) technology to give carriers and private fleets the ability to track powered and unpowered assets including trailers, containers and railcars – providing total supply chain visibility. Designed to scale and adapt to each customer's business needs, the SkyBitz GLS technology is a cost-effective solution that helps fleets lower operating costs and improve their service offerings.
